## SUMMARY

Innovative Flutter Developer with 2 years of experience in creating cross-platform mobile applications. Designed and deployed a comprehensive mobile app with advanced state management and RESTful API integrations, enhancing user engagement. Seeking opportunities to leverage skills in Dart and Flutter to build impactful applications through efficient app deployment and dynamic content delivery.

---

## EXPERIENCE

### Flutter Developer

BrandBuilder Nepal

February 2023 – Present, Chipledhunga, Pokhara

- Designed and deployed a cross-platform mobile application using Dart and Flutter, with support for Android, iOS, and Windows; implemented advanced state management using Provider, Riverpod, and BLoC architecture; and integrated RESTful APIs for dynamic content delivery.

### Internship

Thulo Technology

November 2022 – January 2023, Fulbari, Pokhara

- Developed and optimized mobile applications using Flutter, contributed to the design and development of key app components.

---

## PROJECT

### Rebuzz Ordering

BrandBuilder Nepal, • February 2023 – Present

- Developed a Flutter-based ordering application for mobile (Android, iOS) and Web platforms; implemented local data persistence using Hive, enabled real-time order updates via WebSocket, and ensured responsive UI for a smooth multi-platform user experience.

### Rebuzz POS

BrandBuilder Nepal • February 2023 – Present

- Developed and maintained a cross-platform POS application using Flutter for Android, iOS, Windows, and Web; implemented invoice and billing functionalities, and integrated the Fonepay payment gateway for seamless transactions.

### Electricity Billing

BrandBuilder Nepal • September 2024 – December 2024

- Implemented local storage for offline functionality, QR scanner, and Hive, streamlining the billing process in remote areas and enhancing the efficiency of meter reading and bill generation.

### Foodgasm

Final Year Project • February 2024 – June 2024

- Developed the Foodgasm food ordering app in Kotlin for Android, integrating Firebase for backend functionality and enabling multiple business food ordering within a specific radius. Incorporated Google Maps to enhance user experience and optimize location-based order placement.

---

## EDUCATION

### Bachelor in Science in Computer Science and Information Technology

Tribhuvan University • Nepal • 2024

---

## SKILLS

Dart, Flutter, RESTful APIs, Firebase, GitLab, GitHub, Java, Kotlin, SpringBoot

---
