Projects Undertaken

- **iSend Remit**
 - Url: <https://apps.apple.com/us/app/isend-remit/id1574364176>
 - Remittance application that allows you to make business and individual payments to over 100+ countries worldwide
 - Responsible for developing the iOS application from scratch and leading the mobile team
- **Smart Nora (Sleep tracking)**
 - Url: <https://gen2.smartnora.com/>
 - The app developed for the Smart Nora website connects with the Smart Nora hardware using a Bluetooth Low Energy (BLE) connection.
 - Built using SwiftUI, the app provides a seamless setup process, enabling users to easily connect and configure their Smart Nora devices.
 - It offers daily sleep tracking, allowing users to monitor and analyze their sleep patterns. The app includes a feature to review nightly activities performed by Nora, providing insights into how the device has worked to improve sleep quality.
 - Additionally, it serves as a personal sleep coach, offering tips and suggestions for better sleep hygiene.
 - Responsible for developing the iOS application from scratch and leading the mobile team
- **Bumrungrad**
 - Url: <https://apps.apple.com/us/app/bumrungrad/id1504603205>
 - One of the largest hospitals in Thailand with over 12,000 iOS users. Integrated features like real time appointment booking, E-Wallet, Search, Telemedicine.
 - Worked closely with Project manager to discuss the project time estimates and provide technical feedbacks
 - Key Features: Real time doctor booking, Telemedicine
- **Bonchon Thailand**
 - Url: <https://apps.apple.com/us/app/bonchon-thailand/id1588071316>
 - Led the iOS team to develop the app from scratch to production
 - Worked with the design and client team to provide good user experience to the end users
 - Key Features: Online food delivery, Online Payment, Google maps
- **TrueYou**
 - Url: <https://apps.apple.com/us/app/trueyou/id589399246>
 - Responsible to integrate new features to an existing app
 - Study the existing codebase and code documentation

- Key Features: Get nearby restaurant merchants, redeem points, rate and review restaurants
- **Orbis Pay**
 - Url: <https://apps.apple.com/us/app/orbispay-financial-freedom/id1535590305>
 - Led the iOS team to develop the code architecture and patterns, deployment strategies
 - Closely worked with business team to integrate OWASP security guidelines
 - Key Features: Request advance salary, link bank accounts via Plaid, View transaction history.
- **AEON Wallet Cambodia**
 - URL: <https://apps.apple.com/kh/app/aeon-wallet-cambodia/id1328330562>
